

Cadaver Implantology Course

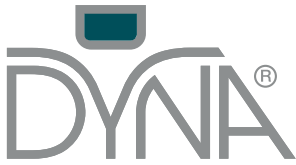

*Perform Sinus lifting and other surgery procedures
on real human tissue.*

8-11 September **2022**

Istanbul, Turkey

11 KRT-POINTS
FOR DUTCH PARTICIPANTS

your comfort is our goal!

The Implantology Course of a Lifetime

- **A three-day all-inclusive experience for implantologists**
- **Get detailed and exclusive insights in sinus anatomy and sinus lifting while training on real human tissue**
- **Train simple and Advanced Autogenous Bone Harvest and Augmentation Techniques with Autogenous Bone**
- **Perform CPR and learn about Intubation techniques for emergency situations with experienced doctors**

All of this by using cooled human cadavers (not embalmed).

This three-day (8 - 11th September) experience in Istanbul focuses on oral implantology and advanced hard tissue reconstruction techniques that cannot be experienced in other similar courses.

The program offers hands-on training, lectures, technical explanations and live surgeries, performed on fresh human cadavers. The complete course takes place in Koç University Hospital of Istanbul, one of the best professional medical facilities in Turkey which upholds all western standards and aims to forward qualified human capital in the healthcare sector.

During this experience you will expand your knowledge about sinus anatomy and sinus lift techniques with the supervision of an Ear-Nose-Throat (ENT) doctor and an oral surgeon. You will perform these techniques using Dyna Helix implants, which are easy to use for any indication. Furthermore, all participants will be able to see the anatomy of the sinus and sinus lifts from inside the cavity itself with the help of an endoscope, a special experience that cannot be done with live patients.

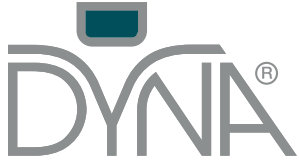

You will learn more about tissue management and how to augment autogenous bone starting from simple cases to advanced 3D augmentations with the help of 'Khoury techniques'.

All participants will be able to practice extracting bone blocks, collect bone with bone scrapers and perform the necessary augmentations to re-use this tissue to supplement their implantology skills.

Last but not least, you will be able to perform intubations as well as PCR techniques on the cadavers with the assistance of a specialized anaesthesiologist. This teaches you valuable skills on how to save lives in possible emergency situations. Of course you will be awarded with an official certificate of the university, proving that you have finished this course.

This professional and exclusive program is complemented with great experiences and good restaurants in the off- hours in the most exiting city of Turkey . Experience the best of what Istanbul has to offer during the evenings, and join us on the exclusive evening cruise on the Bosphorus.

Interested? Read on to find out how you can register!

Locations

Istanbul

The course will take place in Istanbul, Turkey. With about 15 million inhabitants, Istanbul is the largest city in the region and has a very strategic location. It is located in the west of the country, partly in Europe and partly in Asia, making it one of the few cities in the world that lies on two continents. There is regular rainfall throughout the year, both in summer and winter, with most precipitation in winter. The temperature can range from 35 degrees in the summer to a (rare) -10 degrees in the winter.

Must-see sights in Istanbul include churches, mosques and synagogues. In addition, you can find several bazaars in this city, such as the Great Bazaar of Istanbul and the Spice Bazaar.

Istanbul is a city that never sleeps. It offers extensive nightlife experiences with its clubs, bars and concert halls.

Koç University Hospital

Adress: Maltepe Mahalles, Davutpaşa Cad. No:4 34010 Topkapı-Fatih, İstanbul, Turkey.

Intercontinental Hotel

Adress: Asker Ocağı Cad. No:1 Taksim 34435, İstanbul, Turkey

Just a 30-minute drive from Istanbul Airport, this luxurious hotel offers modern rooms including airconditioning . Many rooms offer magnificent views of the Bosphorus and Taksim square.

The hotel is situated in the heart of Istanbul with only a fifteen minute walk to the famous shopping and nightlife district Nisantasi and Taksim square.

Course speakers

Dr. Uğur Meriç

Oral, Dental and Maxillofacial Surgery Specialist

Learn about the Khoury Technique from Prof. Dr. Fouad Khoury
Using autogenous Bone Suitable for Graftless Implantology

Assistant trainers

Dr. Ülkem Cural Dr. Eda Akca
Oral, Dental and Maxillofacial Surgeons

Dr. Tolga Şitilci

Anesthesiology and Reanimation Specialist

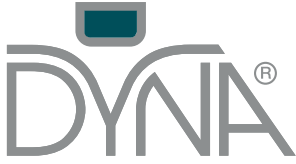

Emergency Intervention in Clinic: Learn how to
Intubate with the Help of an Anesthetist

Prof. Dr. Gediz Murat Serin

Professor of Ear, Nose, Throat Surgery

The anatomy of the sinus
Experience the sinus with an endoscope

Resume of the speakers

Dr. Uğur Meriç - Oral, Dental and Maxillofacial Surgery Specialist

After graduating from Istanbul University Faculty of Dentistry in 1998, Dr. Meriç completed his doctorate program in Oral, Dental and Maxillofacial Surgery Department in 2006 and received the title of specialization. He worked as a lecturer at the same university until 2012. In 2009, he continued his studies on Autogenous Bone Collection and Applications in Implant Applications in the Department of Oral & Maxillofacial Surgery of the Faculty of Dentistry, Germany Münster University and in the private clinic of Prof Dr Fouad Khoury. While continuing his work in his private clinic, he is the head of the oral surgery and implantology master program in Muenster Germany International Medical College (IMC) Turkey and organizes international seminars and courses on the subject.

Dr. Tolga Şitilci - Anesthesiology and Reanimation Specialist

Dr Şitilci graduated from Istanbul University Cerrahpaşa Faculty of Medicine in 1999. After working in the private sector for a while, he became an Anesthesiologist and Intensive Care Specialist at the Istanbul Research and Trainig Hospital. He completed his compulsory service in Malatya. He has been working as a lecturer and anesthesiologist at Istanbul University Faculty of Dentistry since 2010.

Dr Şitilci is a specialist in medical emergencies and how to effectively manage stressful situations, giving training on how to correctly diagnose and set treatments, the tricks of the resuscitation process, the management of a stressed patient, the use of emergency kits and specific medicine, as well as conscious sedation application, the relation between dentistry and systemic diseases, emergency medical conditions and treatments in dentistry, dental general anesthesia, methods of applying dental treatments in common systemic diseases and the consultation process.

Gediz Murat Serin - MD, Professor

During his ear-nose-throat (ENT) doctorate, Prof. MD Serin conducted several scientific research ventures and was a speaker, participant and organizer in domestic and international meetings. He has written many international articles and book chapters. He still continues scientific studies and trains students and otolaryngologists.

General information

Intercontinental Hotel

Just a 30-minute drive from Istanbul Airport, this luxurious hotel offers modern rooms including airconditioning . Many rooms offer magnificent views of the Bosphorus and Taksim square.

The hotel is situated in the heart of Istanbul with only a fifteen minute walk to the famous shopping and nightlife district Nisantasi and Taksim square.

Address: Asker Ocağı Cad. No:1 Taksim 34435, Istanbul, Turkey

Koç University Hospital

One of the best professional medical facilities in Turkey which upholds all western standards and aims to forward qualified human capital in the healthcare sector.

Address: Maltepe Mahalles., Davutpaşa Caddesi, No:4 34010 Topkapı-Fatih / İstanbul

About the Cadavers

The skulls are not embalmed, but frozen before use. All cadavers are washed and prepared before the course. The skulls are handled with aesthetics in mind to ensure that the dignity of the donor is respected. No donors have a history of diseases or conditions. You will be instructed to handle the cadavers with care. No information will be given to you about the donor's history.

Staff

The support staff for the course consists of a team of highly skilled and experienced professionals who have lectured in these types of seminar for many years. They also support the participants during the hands-on course.

The Certificate

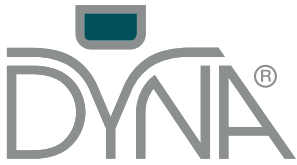

Upon completion of the Hands-on course, you will receive a certificate with proof of participation in the course.

Taking photos

In order to treat the donors with respect, taking photos or videos is not allowed in the dissecting room.

No Written Test

There will be no written test administered during or after the course to obtain the certificate.

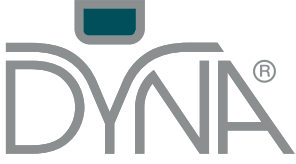

Why attend?

Participants have the opportunity to:

- Have a surgical hands-on learning experience;
- Learn about all aspects of the sinus area;
- Perform autogenous bone augmentations;
- Perform intubation on real tissue, which can save lives in your practice;
- Practice treatments on cadavers, to be able to apply them later to patients;
- Discover and practice on delicate anatomical structures;
- Learn by seeing, touching and exploring the various anatomical planes, fascia, muscles, nerves, arteries, veins and organs;
- Experience structural anomalies;
- Utilize professional facilities at a state of art training center.
- Attend the only anatomical and surgical step-by-step course with a multi-disciplinary approach from an ear-nose-throat (ENT) specialist, oral surgeon and an anesthetist;
- Extensive knowledge is not required to sign up;
- Study in a friendly and easy-to-learn environment;
- Focus on pitfalls and common mistakes in facial surgery.
